What about Citizen Development? 😊

- We discussed Low Code solutions

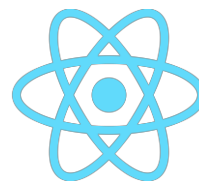

- Key Questions

- Do our functional experts really want to develop workflows themselves? **NO**
- Do Raiffeisen organisations outside RIS really want to develop workflows themselves? **NO**
- Will we become faster if we use low code solutions? **NO**
- Are there enough experts on the market? **NO**
- Do low code solutions fit our DNA? **NO**

BPMN Industry Standard (ISO)

Process Definition vs. Process Instance

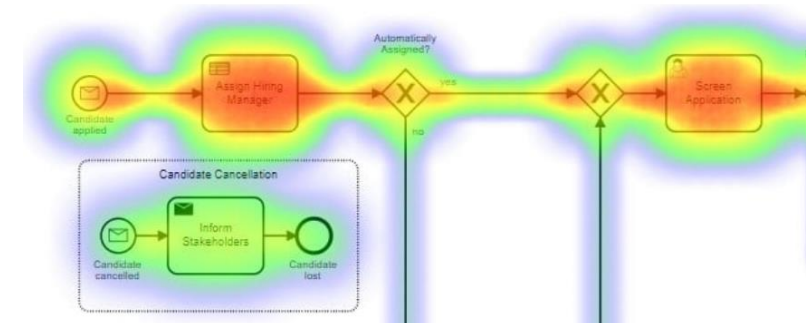

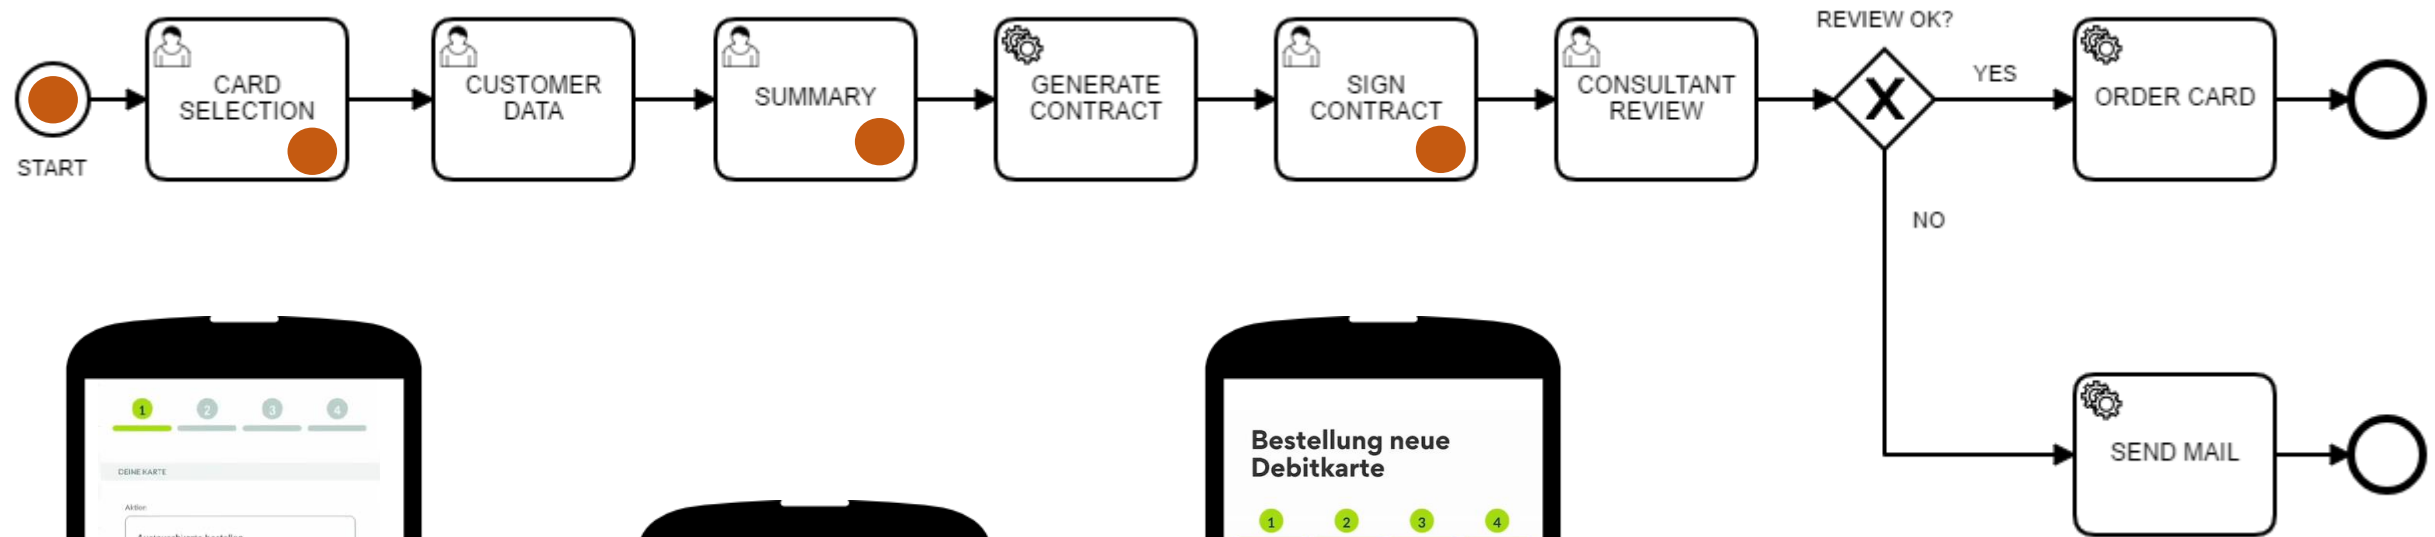

Orchestration of

- Humans
- Decisions
- Software components

Advantages

- Persistence of state
- Managed control flow (sequence)
- Guaranteed and controlled task execution
- Out of the box KPIs (SLAs, cycle times...)

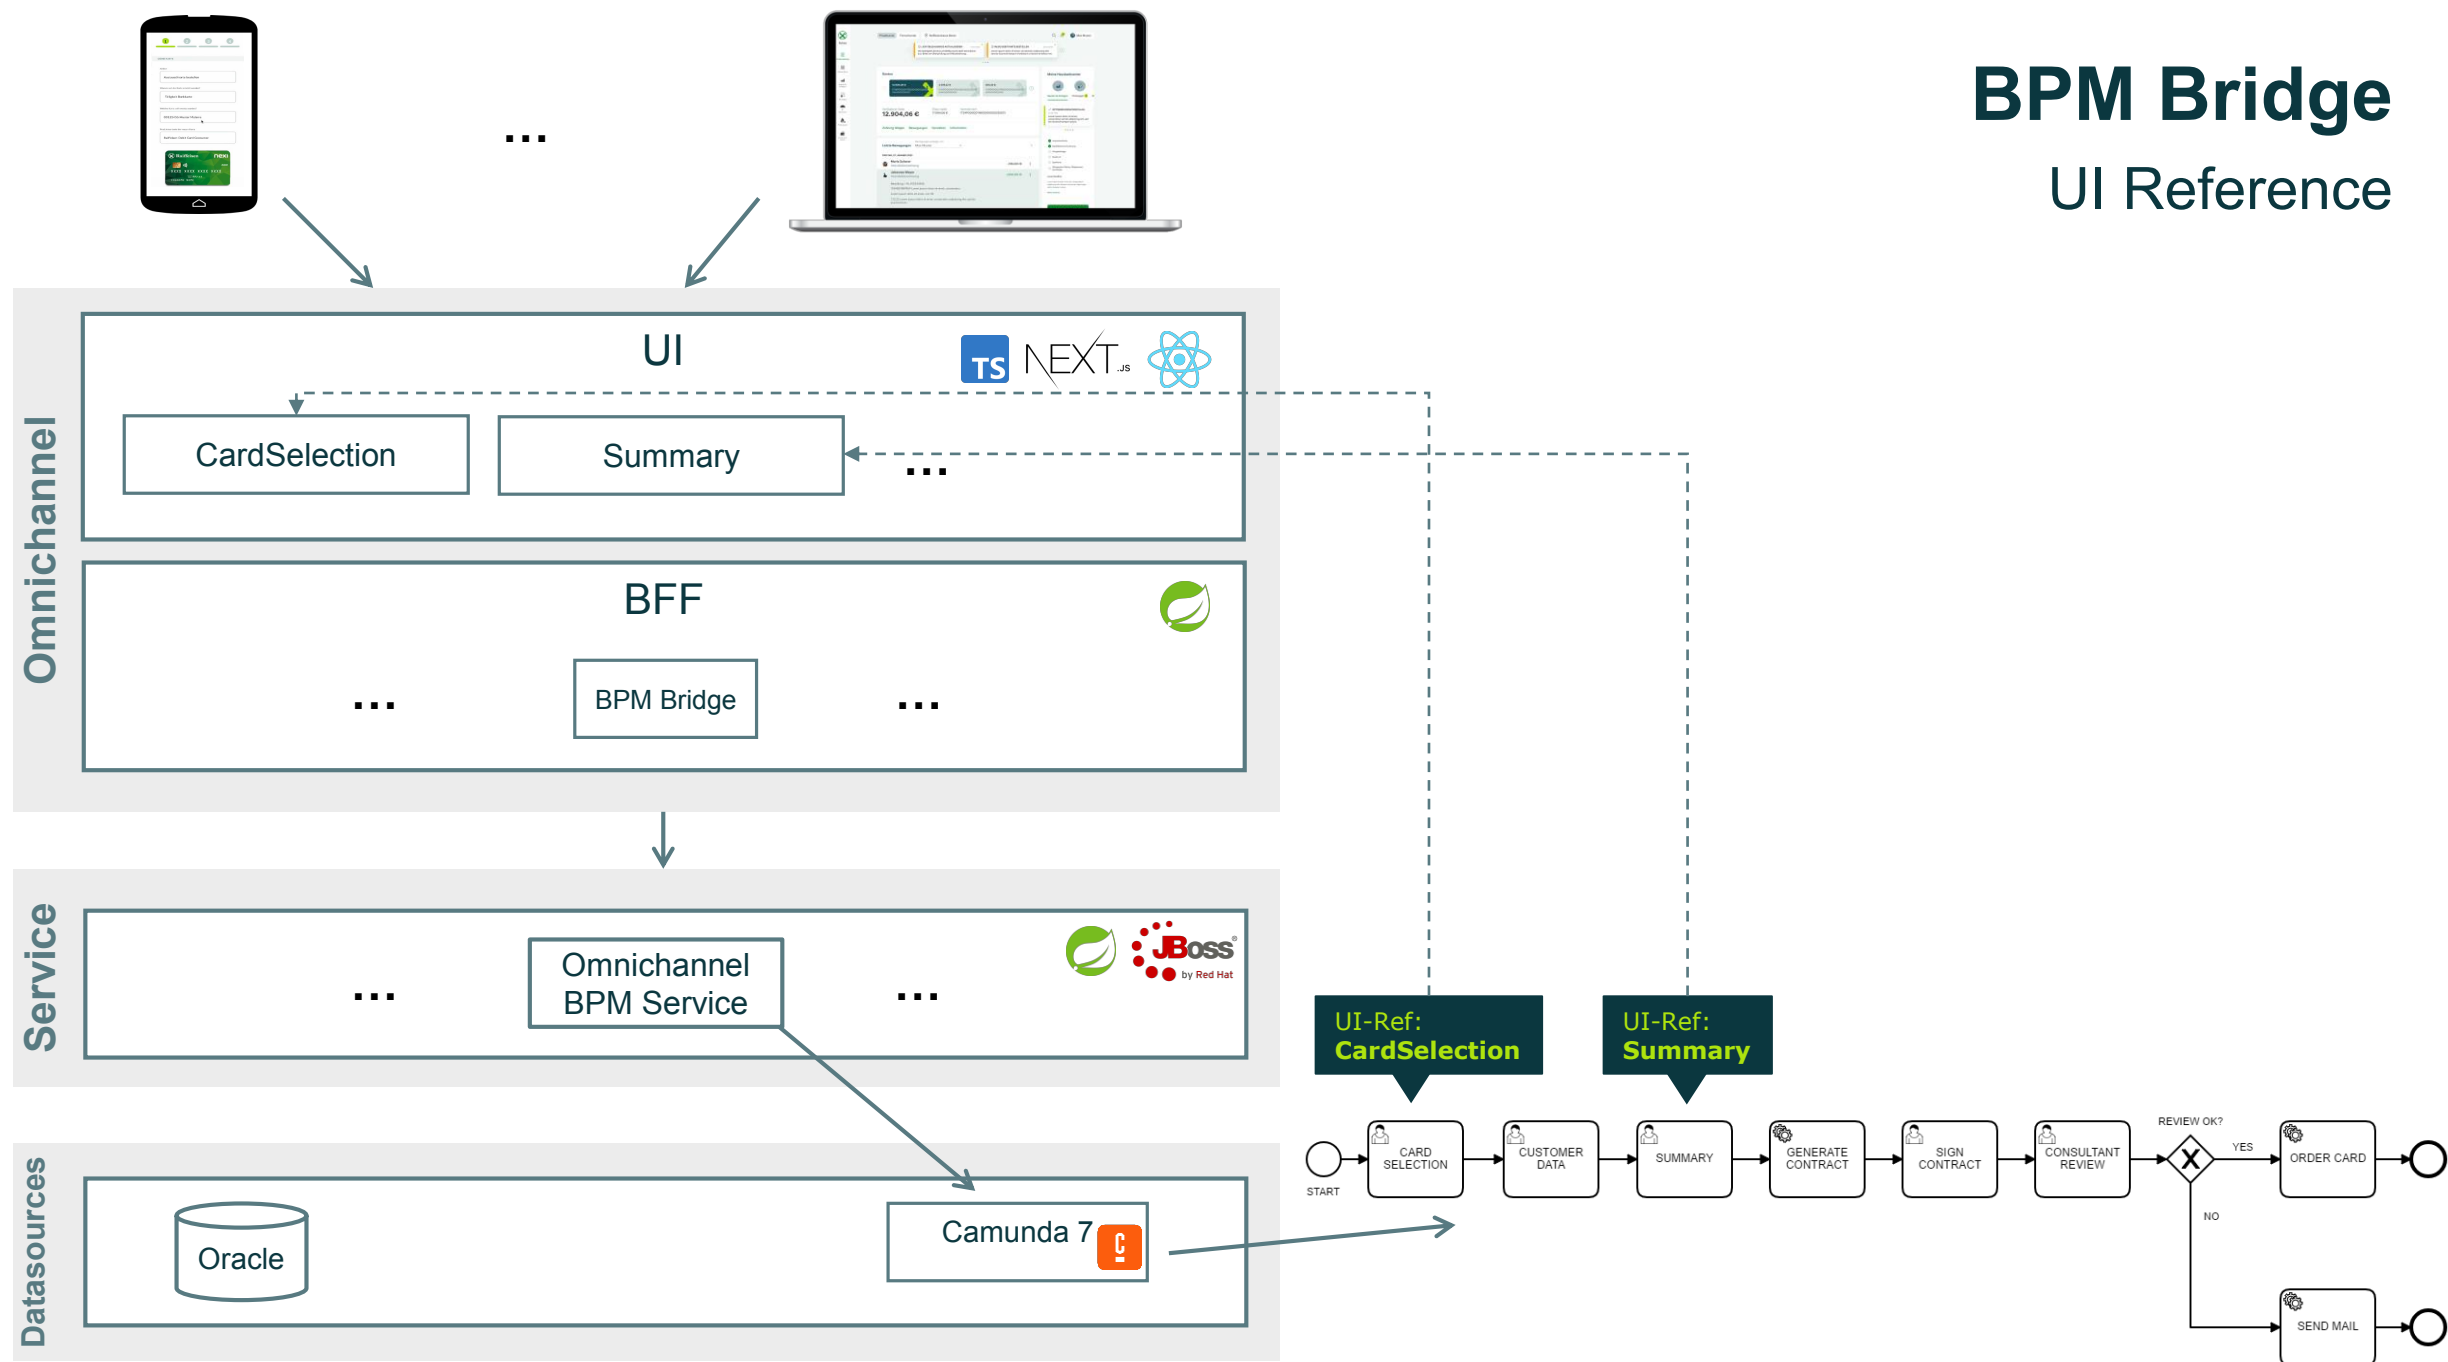

The screenshot shows a mobile app interface for ordering a new debit card. At the top, there are four numbered steps: 1 (highlighted), 2, 3, and 4. Below the steps, the text 'KEINE KARTE' is displayed. Under the heading 'Aktion:', there is a button labeled 'Austauschkarte bestellen'. Below this, the question 'Warum soll die Karte ersetzt werden?' is followed by a button labeled 'Fälligkeit Bankkarte'. The next question is 'Welcher Karte soll ersetzt werden?', with a text input field containing '00123456 Muster Melanie'. Below this, the question 'Produktvariante der neuen Karte:' is followed by a button labeled 'Raiffeisen Debit Card Consumer'. At the bottom, there is a preview of a green Raiffeisen nexi debit card with the text 'XXXX XXXX XXXX XXXX' and 'COGNOME NOME'.
